EDUCATION

Northeastern University **Boston, MA**

Candidate for Bachelor of Science in Data Science and Environmental Sustainability Sciences **Expected Graduation : 2027**

Relevant Coursework: Advanced Programming with Data, Discrete Structures, Machine Learning, Information Visualization, Intermediate Programming with Data, Fundamentals of Computer Science, Foundations of Data Science, Cornerstone of Engineering

SKILLS

- **Languages & Frameworks**: Python, Dr.Racket, Java, C++
- **Libraries:** pandas, NumPy, Matplotlib, Seaborn
- **Developer Tools**: Github, Excel, Word, PowerPoint, Outlook, Git, Anaconda Navigator, WAVE
- **Skills:** Data Visualization, Machine Learning (regression, classification), Digital Accessibility

PROJECTS

Budget Greens || *Python, Jupyter Notebook*

- Developed a data-driven Python program that generates a grocery list based on budget and sustainability guidelines.
- Applied World Health Organization guidelines to promote link budgeting, nutrition, and chronic disease prevention.
- Implemented interactive data-handling functions using random sampling and conditional filtering to optimize grocery selections.
- Visualized pricing trends and produce categories with Matplotlib and Seaborn (bar charts, scatter plots, pair plots).

EXPERIENCE

ADA Compliance Lab, Digital Accessibility Coordinator **January 2026- June 2026**

Northeastern University **Boston, MA**

- Ensure computer science courses at Northeastern meet federal accessibility standards.
- Evaluate digital content for compliance with the Web Content Accessibility Content (WCAG).
- Conduct testing with assistive technologies to support accessibility maintenance.

John D. O'Bryant African American Institute Building Proctor **September 2023- May 2026**

Enrichment Leader **Boston, MA**

- Foster a welcoming and inclusive environment for all visitors, with a focus on supporting students of color.
- Support event operations by assisting with setup and guest needs to ensure successful execution.
- Assist visitors by providing directions to office staff and answering questions about the building's resources.

CORE LAB Undergraduate Research Assistant **July 2024 - September 2024**

Northeastern University **Boston, MA**

- Analyzed and categorized qualitative research data from research participants using Excel to improve research efficiency and organization.
- Collaborated in weekly team meetings to refine data interpretation strategies, ensuring accuracy and consistency in data interpretation.
- Presented findings to research teams, strengthening skills in data storytelling and research communication.

PROFESSIONAL DEVELOPMENT

ColorStack **January 2024 - Present**

Team Member

- Participate in weekly LeetCode sessions to strengthen problem-solving and algorithmic thinking.
- Engage in skill-building workshops on data structures, technical interview prep, and best coding practices.

Haitian Student Unity **January 2024 - Present**

Event Coordinator

- Coordinate and organize cultural and educational events across Boston-area universities to strengthen community connections and celebrate Haitian heritage.

MLT Career Prep **January 2025 - Present**

Technology Track Fellow, Career Advancement Program **Boston, MA**

- Selected from a competitive applicant pool for a highly regarded career development program focused on fostering promising careers for underrepresented minorities in STEM fields.
- Engage in personalized coaching and mentorship through virtual sessions and in-person meetings with career advisors.
- Collaborate with industry professionals and peers to build strong career habits and expand leadership potential.
